simple and smart tracking

How long do your employees spend time at a place?

Bab, the bluetooth tracker and access point technology allows users to manage employees' time and attendance system which is used to track and monitor when & where employees start and stop work. A time and attendance system enables an employer to monitor their employees working hours, late arrivals, early departures, time taken on breaks and absenteeism. Users can check data history as well and get reports about records of location and time.

Do your employees maintain social distance?

Bab beacons offer the technology to keep a safe space and maintain social distancing between employees by using ultra-high frequency sounds and bluetooth so it does not require an active internet connection to work.

Bab can get users notified by alarm/vibration when the space between employees less than it is required which is usually 2 m. Bab offers great tech solutions to enterprises about health and hygiene regulations regarding pandemic.

Do you control room capacity and try not to exceed it?

Bab bluetooth systems can be used to limit the number of people entering or staying in your room on a given day by applying capacity levels to the space. Bab can get users notified when the space usage is higher than allowed or when it is about to reach full room capacity.

Bab offers great tech solutions to enterprises about health and hygiene regulations regarding pandemic.
